# PROBLEM STATEMENT

**Employee performance analysis is analyse to find the attendance percentage of an employee to calculate his salary**

Edit with WPS Office

# PROJECT OVERVIEW

**This project is about analysing the employee performance which will help to calculate the salary for an employee. It is very easy process for an employer to calculate.**

Edit with WPS Office

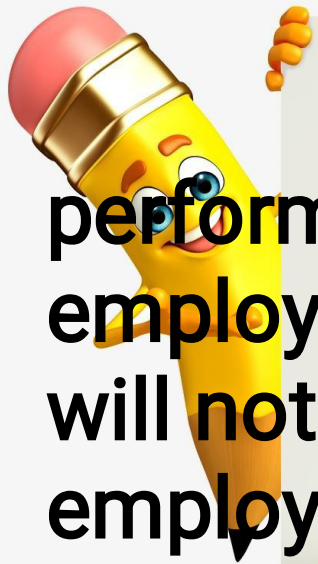

# WHO ARE THE END USERS?

The company and employees both are get benefits by analysing the performance of an employee.

Edit with WPS Office

# OUR SOLUTION AND ITS VALUE PROPOSITION

Our solution is employee's annual performance, attendance and etc. If the employee have less attendance percentage he will not get his bonus amount but if the employee have higher attendance percentage he will get his salary promotion. So I analysed performance of an employee .

Edit with WPS Office

# Dataset Description

**I took employee's Employment id, Name, Gender, Department, Salary, Salary date, FTE, Employment type, Work location for analysing the data.**

Edit with WPS Office

# THE "WOW" IN OUR SOLUTION

The wow factor in my presentation is, I find the attendance percentage of an employee so that the employer can easily calculate the employee's salary.

# RESULTS

**Some of the employee have high salary and some of them have low salary. I found this through the data base by draw them in graph.**

# conclusion

**Finally I conclude that the performance of employees analysis is very important for a company. We can calculate the salary of an employee through analysis.**
